

In Their Own Words

What Supporters Are Saying

"Early projections estimate the Nebius project would generate approximately \$80 million in annual education tax revenues – a sizable investment that will support improved classrooms, teacher resources, and expanding opportunities for students across our community."

– **Dr. Mark Sullivan, Superintendent, Birmingham City Schools**

"As a partner in the growing AI economy and the parent company of a career training platform focused on job placement in technology roles, Nebius brings an established model for training and workforce mobility. This type of approach expands access to high-growth careers and strengthens pathways from education to employment."

– **Dr. Bobbie Knight, President, Miles College**

"We see every day how important it is for students to connect classroom learning to real-world opportunities. When critical industries invest in Birmingham, students gain a clearer path to build their futures."

– **Dr. Melvin Love, Principal, Oxmoor Valley Elementary**

In Their Own Words

What Supporters Are Saying

"This project represents a transformative investment in our local economy...The construction phase will generate hundreds of skilled trade jobs over multiple years, supporting contractors, engineers, and suppliers across the region."

- **Jefferson Traywick, Economic Development Advisor, Jefferson County Commission**

"If we as the Birmingham region want to remain competitive not only globally but locally, AI centers are necessary. It's not just about this one project. This is about positioning the region for the future of our workforce."

- **Steve Ammons, CEO, Birmingham Business Alliance**

"Cities and communities that position themselves to host this infrastructure will have a decisive advantage in the decades ahead. Birmingham has an opportunity — right now, on land already planned and zoned for exactly this purpose — to plant a flag in that future."

- **Herschell Hamilton, CEO, BLOC Global Group**

"Nebius's commitment to Birmingham affirms our rise as a tech hub. And we have a chance to get this right: to grow jobs, strengthen our research community, and lead the nation in building AI infrastructure that is both rapid and responsible."

- **Deon Gordon, President & CEO, TechBirmingham**
